

Muhammad Talal Akhtar

Aspiring Software Developer | C++ | Full-Stack | Fast University Student

✉ muhammadtalalakhtar01@gmail.com ☎ +92 332 6516291 ♦ G-13, Islamabad

SUMMARY

Software Development-focused Computer Science student with a foundation in C++, object-oriented programming, data structures, algorithms, and system design. Experienced in building end-to-end software solutions across the Software Development Life Cycle (SDLC), with hands-on exposure to full-stack development using the MERN stack. Skilled at translating requirements into scalable, maintainable solutions while adhering to industry-standard development, testing, and deployment practices. Possesses strong analytical and problem-solving abilities, attention to detail, and a collaborative mindset. Eager to learn, grow, and contribute in a dynamic professional environment while continuously expanding technical and cross-functional expertise.

PROJECTS & WORK EXPERIENCE

Electronic Voting System (Academic Project) | Fall 2025

- Developed a full-stack electronic voting system using the MERN stack.
- Implemented secure voter authentication, vote casting, and real-time result generation through RESTful APIs.
- Designed responsive, user-friendly interfaces in React to ensure accessibility and smooth user interaction.
- Integrated backend logic using Node.js for authentication, session management, and vote tallying.

Student Management System | (Academic Project) | Spring 2025

- Built a full-stack student management system using the MERN stack (React, Node.js).
- Implemented core features including student registration, record management, and search functionality.
- Designed an interactive and responsive React-based front end for seamless navigation and form handling.
- Ensured smooth integration between front end and back end to deliver a scalable, real-time solution.

Xonix Game | C++ (SFML) | Oct 2024 – Dec 2024

- Developed a 2D arcade game using C++ and SFML with real-time rendering and event handling.
- Implemented game logic, collision detection, enemy behaviour, and scoring using OOP principles.
- Applied SDLC practices including design, implementation, testing, and debugging.

SKILLS

- **Programming Languages:** C++ (Advanced), JavaScript, HTML, CSS
- **Core CS Foundations:** Data Structures & Algorithms, Object-Oriented Programming
- **Software Engineering:** SDLC, Requirements Analysis, Design, Implementation
- **Web Technologies:** React, Node.js, RESTful APIs
- **Version Control:** Git, GitHub
- **Development Practices:** Modular Design, Code Reviews, Debugging, Performance Optimization
- **Tools:** VS Code, Trello
- **Soft Skills:** Communication, Teamwork, Problem-solving, Analytical thinking, Attention to detail

EDUCATION

National University of Computer and Emerging Sciences (FAST), Islamabad

(2024-2028)

Bachelor of Science in Computer Science

Islamabad, Pakistan
